

SPR 2024 PEDIATRIC RESEARCH COURSE

LIVE ONLINE

MARCH 1 & MAY 17

Participants will be exposed to basic concepts on research methodology and statistics applied to the radiological sciences in order to advance their research projects from a given level of conduct to the next level on a personalized basis.

March 1: Full Day Course

Didactic and interactive sessions on a variety of topics including:

- Introduction to basic concepts on research methodology.
- Exploration of statistics methods and sample size estimation tools and sources.
- Tips on how to draft a manuscript, finding a mentor and authorship challenges.
- Personalized tutorial sessions and debrief on common pitfalls in research design.

May 17: Half Day Course

Didactic and interactive sessions on a variety of topics including:

- Debrief common pitfalls and errors in research design.
- Explore tips on how to edit manuscripts.
- Receive feedback from peers about challenges in completing their course tasks.
- and MUCH MORE!
